(1) Executive Summary

Welcome to Protoex.finance, the Zooplankton NFT concept on the Finance platform, as a digital art asset that provides you with financial features.

Protoex.finance gives you the option of saving in the form of art as well as financial benefits. in other words you can interact with the protoex-ans, you can collect them, auction them off, or make them your miners. Our focus is on 2 Things.

The "ProtoN Token" token based on the BSC network that we will launch, which is the core of protoex.finance, the driving force of all platforms on protoex.finance. Protoex NFT, digital collectibles that can generate ProtoN Tokens. We will explain the features of protoex.finance platform in detail.

(1.1) What is Protoex.Finance?

Protoex.finance is a blockchain-based form of finance that does not rely on central financial intermediaries such as brokerages, exchanges, or banks to offer traditional financial instruments, and instead utilizes smart contracts on blockchains, operates on Binance Smart Chain network with a main focus on digital currency and NFTs (Non-fungible Tokens) a digital file with verified identity and ownership.

This verification is done using blockchain technology. Simply put, Blockchain technology is an un-hackable system based on the mathematics of cryptography.

Protoex.finance is also as the umbrella brand for the ProtoEX (Proto Exchange), the NFT marketplace that we will launch shortly. Decentralized financial concept with mining, farming and NFT markets all in one place.

Represents an NFT platform with a special focus on financial and digital art assets.

(1.2) What is ProtoN Token?

ProtoN Token (Protoex NFT Token) is a BEP-20 token we will launch that use complex algorithms to generating liquidity and burns supply in transaction automatically, providing a deflationary token. Reducing the supply continuously will increase the token value in the long term.

ProtoN token is an essential part of the ProtoEX platform, as well as being the core of the entire Protoex.finance platform, including markets, NFT creation, mining and other features.

Just like the protoex-an, they are scattered all over the world, so that is similar with our mission. ProtoN Token is aiming for a massive market capitalization with a strong community spread all over the world.

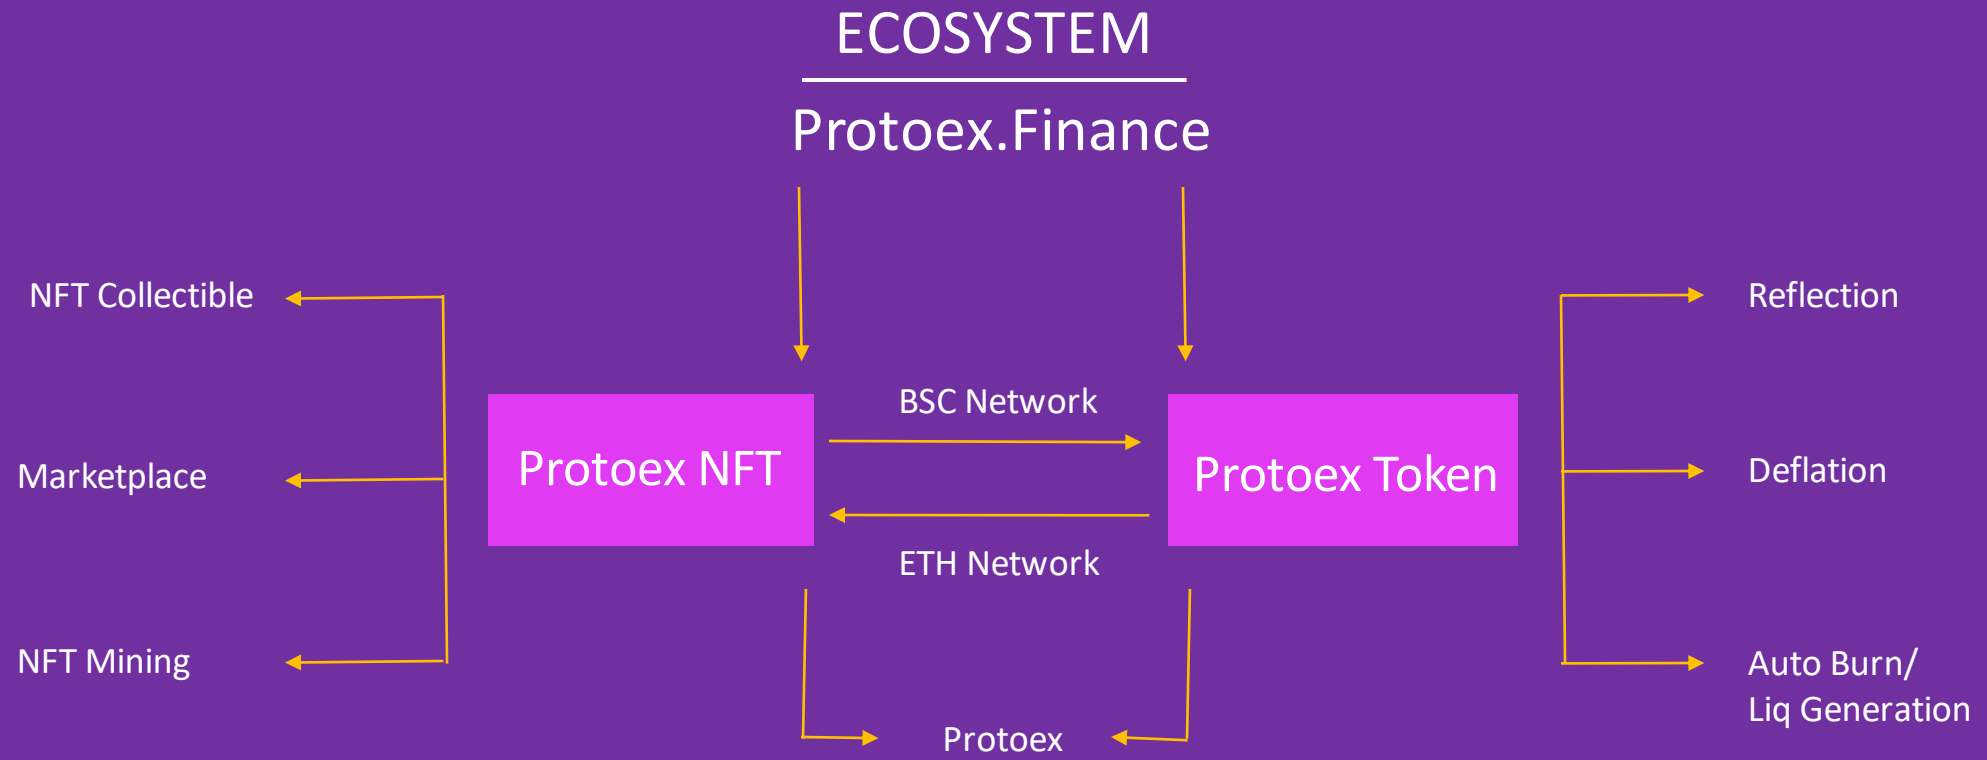

(1.3) How do Protoex NFTs work?

A non-fungible token (NFT) is a unit of data stored on a digital ledger, called a blockchain, that certifies any digital file to be unique. Protoex NFT functions like a cryptographic token, but unlike cryptocurrencies such as Bitcoin, are not mutually interchangeable, in other words, not fungible. Protoex NFTs are created when blockchains string records of cryptographic hash, a set of characters that verifies a set of data to be unique, onto previous records therefore creating a chain of identifiable data blocks. This cryptographic transaction process ensures the authentication of each digital file by providing a digital signature that is used to track NFT ownership.

Protoex NFTs live on the Bsc Network and can be bought and sold on any BSC based NFT market. If you have a Protoex NFT You can easily prove that you own it, no one can manipulate it in any way. You can sell it, or, you can hold it forever, resting comfortably knowing your assets are secured by your wallet..

(2.1) Protoex NFT

Protoex are living things that have many species, currently, there are about 30000 protoex species are known.

We think that different types of protoex make each type is unique as an NFT concept,

with so many species, we will make each NFT one and only, that makes it very rare and valuable collection.

The Protoex NFT is designed to generate ProtoNFT Token (ProtoN) automatically.

At a high market cap and high transaction rates, certain percentage will be reflected to the NFT owner. (percentage depends on the type of NFT.
That way the NFT will bring passive income to the owner.

(2.2) NFT Mining

Each Protoex NFT has the ability to mine, its abilities vary, depending on the class. They produce protoex tokens which can be exchanged for BNB.

Mining pool is provided on the protoex.finance platform. To make your NFT work, you only need to let them enter the mining area, and they will generate tokens for you.

(2.3) NFT Collectible

Protoex Finance has intertwined its BSC based "NFTs" Non-Fungible Tokens (Protoex NFT) to the BSC Protoex Token mining pool.

The goal is to reward N F T 's owner to receive Protoex token simply by collecting them.

NFT protocol collectibles will also include the A.R.R. (Accept, Relinquish, Reward) features that will allow collectors to interact with their NFTs and earn reward with mining, lottery, friction-less farming or its digital reward-based model.

During the months to come, the Protoex finance will be launch a new series of Protoex NFT Ver 2.0 on a BSC NFT crypto wallet.

(2.4) ProtoEX

At its core, ProtoEX is a NFT (non-fungible token) platform for securing digital collectibles secured with blockchain technology. To fully understand what this means, one needs to understand the nature of NFTs, which we will dive deeper into later. Put simply, non-fungible tokens are “u n i q u e” in a sense and can, therefore, be excellent when it comes to signaling ownership over a specific asset. Fundamentally, ProtoEX represents a digital NTF platform with a particular focus on art assets.

Specifically, ProtoEX includes a marketplace that allows users to trade various digital collectibles or NFTs, similar to OpenSea.

Users can also use ProtoEX to create - commonly known as “m i n t i n g” NFTs, or non-fungible tokens. This is a big deal for various content creators. For example, an artist could sell their creations, such as books, music albums or movies, as NFTs.

Protoex is also placing significant emphasis on creating an entirely autonomous platform, run through a community governance model.

The goal of a true Decentralized Autonomous Organization DAO is that the platform users will be the ones in charge of all the decisions for the platform - meaning P r o t o z o a 's PROTON governance token is crucial.

ROADMAP

FIRST

- Concept Development
- Creating Team

SECOND

- Created Smartcontract
- Website Release
- Airdrop
- Launch on Pancakeswap
- Marketing influencer
- Building NFT Platform
- Listed on hotbit.io exchange

THIRD

- Beta live ProtoEx
- Beta live NFT Platform
- NFT Rewards Holder
- NFT Lottery
- Mining Pool
- Listing on CEX Exchange

FOURTH

- NFT Platform Release
- Marketing influencer
- Partnership
- More listing on CEX Exchange
- Roadmap v2

4.1) Our Vision & Mission

Vision

- We see the positive prospects of the blockchain system which has positive uses apart from being a tradable asset, especially in securing intellectual property. Blockchain technology divides data into special and encrypted blocks, then connects to each other in an information storage, making the stored information transparent. Any intellectual property can be encrypted on the blockchain, so that it can validate the copyright of the intellectual property. We undoubtedly support the use of blockchain to protect the rights of every intellectual property owner that is very valuable.

Mision

- NFT or non-fungible token is a token that can display uploaded files, whether in the form of visual, audio or other * other creation, ownership, and transactions recorded * in the blockchain ledger. We see remarkable benefits from the transparency in which the NFT and blockchain system Provides. Therefore here are our mission to support it:- To become a platform for creating and transacting NFT- Conduct a campaign for the utilization of the NFT and open up opportunities for its use in the future.- create bridges between networks, thereby expanding the reach of users and their transactions.

HIGHLIGHT OF PROTOEX

PROTOEX SECURED VERIFIED Of Cryptocurrency Exchange. Protoex Is An All-in-one Exchange. It Was Built With Custom Coding That Is Specifically Designed To Resolve Major Issues With Other Popular Exchanges Surrounding Decentralized Finance (Defi) Tokens While Combining The Functionality For Token Swaps. PROTOEX Also Provides A Bridge For Multi-chain Interoperability.

- Why Protoex? PROTOEX Give You Reward Fee 90% In 1 Tx On Proton Token . Exchange Fees For Buying And Selling When Paired With Ethereum (ETH) And Binance Coin (BNB).
- What Does This Mean? Investors Save PROTON Incurred With Other Exchanges. Additionally, Investors Have The Hold More Proton. Just Copy Tx On “Claim” Page We Send Manually Proccessing It
- What Are Some Other Highlights Of Protoex? Ability To Stake Any Token Listed And Earn USDC, USDT And BUSD Directly*
- Ability To Launch Multi-asset Pools With Weighted Proportions, Which Will All Have The Ability To Cross trade Built-in Liquidity Locking Option, Which Eliminates The Need To Search For Where The Liquidity Is Locked.
- Smart Secured Liquidity Options, All Token Listed On Protoex Will Review Manually Smart contract By A Tech Team, Allow Investors To Add Or Remove One-sided Liquidity To Help Ease The Effects Of Impermanent Loss And Provide.
